Easily display and manage your digital photos
- Have fun with collages: display mutiple photos in one view
- View USB flash drive photos without a PC

Simple intuitive operation and great convenience
- Auto photo orientation to fit portrait or landscape modes

Green design
- Auto turning display on/off at preset times for power saving

Stylish and curve design complements your photos
- Tasteful glossy finishing and great touch feeling

PHILIPS

sense and simplicity

PhotoFrame
8" LCD 4:3 frame ratio

8FF3FPB/27

Highlights

High Pixel Density Display
The very best high density screen shows off your treasured photos with the same 'real life' rich detail and vibrant colors as high quality prints.

imagen technology
imagen is exclusive Philips photo enhancement technology that automatically analyzes your photos to correct color and adjust for optimal contrast: imagen separates colors to avoid "crosstalk" adjusts brightness distribution for great visual contrast and corrects Gamma for color accuracy.

4:3 perfect frame ratio
Philips digital PhotoFrame ensures your photo to be displayed in 4:3 ratio for the best viewing experience.

RadiantColor
RadiantColor is an exclusive Philips technology for displaying smaller photos in the optimal 4:3 ratio by extending the color on the edges of a less-than-full-screen photo to the sides of the screen, eliminating black bars and aspect ratio distortion.

Multiple-photo collage effect
It's a slideshow effect to show photos in collage form that automatically and randomly compiles different photos together to avoid unattractive borders that may result from photos which are smaller than the screen size.

Viewing photos in USB flash
A USB connector for easy viewing and sharing of photos stored on USB flash drive.

SmartPower
A timer turns PhotoFrame on and off at the hours you select, reducing energy consumption for the sake of our environment saving up to one third of your PhotoFrame energy costs.

Auto orientation
Automatic landscape/portrait recognition employs a sensor that recognizes PhotoFrame orientation and displays each photo in its proper mode.
